LND, Inc – Commitment to the Environment

Environment Policy Statement

LND, Incorporated is committed to protect the health and safety of our employees, customers and the environment. Our safety office continually interfaces with our suppliers to ensure that the products that we are provided are environmentally compliant with current global regulations. Our goal is to consistently respond to the changing requirements of our customers, including their environmental issues. At times individual countries and industries implement specific environmental product standards. At LND, Inc. we continuously monitor and respond to these directives.

LND, Inc. has reviewed the European Union Restriction of Hazardous Substances (RoHS) Directive 2002/95/EC and the Waste Electrical and Electronic Equipment (WEEE) Directive 2002/96/EC. These directives specify that certain applications are *exempted* from compliance with the "lead-free" standard.

LND, Inc. claims an exempt status from these directives for the following reasons:

- LND, Inc. routinely supplies replacement detector tubes to customers using equipment manufactured prior to 1 July 2006;
- We supply detector tubes to the medical community and medical equipment manufactures for monitoring the use of radioactive isotopes;
- We supply detector tubes to military organizations (U.S. and NATO) and to customers involved with the ever growing national security technology field;
- None of the detector tubes manufactured by LND, Inc. contain a self-sustaining power supply;
- These detector tubes do not have a direct function when not incorporated into another installation;
- Our detector tubes cannot fulfill their main function without being connected to a base unit containing a power source;
- Based on the RoHS directive Annex, Item 7, electronic ceramic parts containing lead are exempt.

In accordance with IPC Standards 1751 and 1752, LND Inc. will supply a Material Declaration on an as required basis with each shipment detailing where leaded materials were used as part of the final product.
